

## **CONCOR-1 Community Advisory Committee**

As of July 2020, the CONCOR-1 Community Advisory Committee (CAC) has been officially formed. The group is composed of seven committee members, who represent our diverse Canadian population. Our members bring to the table a wealth of their experiences and diversity: COVID19 patients; blood donors; representing minority groups; having families in Long Term Care homes during the pandemic; and delivering front line health care. The lived experiences of the CAC members will undoubtedly benefit the conduct of the trial, its analysis and dissemination of its results. The CAC will meet monthly to discuss aspects of the trial and its milestones, and provide comments and feedback to the research team.
